Phone: +8801327368859

Address: Dhaka, Bangladesh

Portfolio: afrindev.netlify.app

CAREER OBJECTIVE

Motivated and detail-oriented Full Stack Developer with a strong foundation in modern frontend technologies. Experienced in building responsive and interactive web applications using React, REST APIs, and secure authentication flows. Passionate about continuous learning and eager to grow within a dynamic, real-world development environment like 6sense Technologies.

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, React Router, Context API, TanStack Query, Axios, Responsive UI Design, Mobile-First Development

Backend: Node.js, Express.js, MongoDB, Firebase Authentication, REST APIs, JWT, API Integration

Tools & Technologies: Git & GitHub, Vite, VS Code, Firebase Hosting, Netlify, Postman, Google Fonts, Chrome DevTools

PROJECTS

[Live](#) | [GitHub: Client](#) | [Server](#)

1.TaskHub - Freelance Task Marketplace

Overview: A full-stack freelance marketplace where clients can post tasks and freelancers can submit competitive bids, enabling a dynamic service exchange platform.

Major Features:

- User authentication using Firebase and JWT
- Task posting and bid submission
- Task owners can view and manage bids
- Protected routes and role-based dashboard

[Live](#) | [GitHub: Client](#) | [Server](#)

2. KindHands - Volunteer Management System

Overview: A campaign-based volunteer management platform that connects organizers with interested volunteers while ensuring secure registration and admin control.

Major Features:

- Browse and search campaigns
- Volunteer registration form with image upload
- Admin CRUD operations for campaigns
- Dark/light theme toggle and responsive UI
